

fn_vbs_arrayPopStack

Introduced in	
Version:	1.22
Description	
Description:	Removes the specified number of elements from the end (rightmost side) of an array, and returns them. The original array is modified by reference. This function is similar to fn vbs arrayPop . However, more than one item can be removed.
Syntax	
Syntax:	[array, removenum] call fn_vbs_arrayPopStack
Parameters:	<ul style="list-style-type: none">array: Array - Array to modify.removenum: Number - How many elements to remove from the right.
Return Value:	Array - Elements removed from the array.
Warning	
When using functions in VBS versions older than 3.4 , certain limitations and requirements should be kept in mind - the main ones being that capitalization of the function name is crucial, and that #include "vbs2\headers\function_library.hpp" has to be included in every script that utilizes it.
