

fn_vbs_getSystemItemName

Introduced in	
Version:	3.4
Description	
Description:	Returns the name of the given Systems-Menu item. For more information, see Systems Menu in the VBS3 User Manual.
Syntax	
Syntax:	[vehicle, systemItemID] call fn_vbs_getSystemItemName
Parameters:	<ul style="list-style-type: none">vehicle: Object - The vehicle.systemItemID: Number - The system item ID.
Return Value:	String - The name of the item, or nil if the item does not exist.
Warning	
When using functions in VBS versions older than 3.4 , certain limitations and requirements should be kept in mind - the main ones being that capitalization of the function name is crucial, and that #include "vbs2\headers\function_library.hpp" has to be included in every script that utilizes it.
