

fn_vbs_getTurretCfg

Introduced in	
Version:	1.20
Description	
Description:	Returns the configuration of the specified turret of the specified vehicle. This can then be used to extract parameters from the turret configuration.
Syntax	
Syntax:	[vehicle, turret] call fn_vbs_getTurretCfg
Parameters:	<ul style="list-style-type: none">• vehicle: String or Object - String class name of vehicle, or vehicle object (V1.30+).• turret: Array - Turret path (for example, [0,1]).
Return Value:	Config-2
Warning	
When using functions in VBS versions older than 3.4 , certain limitations and requirements should be kept in mind - the main ones being that capitalization of the function name is crucial, and that #include "vbs2\headers\function_library.hpp" has to be included in every script that utilizes it.
