

fn_vbs_aw_getBodyPartID

Introduced in	
Version:	3.7
Description	
Description:	Converts the name of a body part into its associated ID.
Syntax	
Syntax:	bodypart call fn_vbs_aw_getBodyPartID
Parameters:	<ul style="list-style-type: none">bodypart: String - Name of bodypart to convert.
Return Value:	Number - Associated ID of body part, or -1 if part does not exist.
Warning	
When using functions in VBS versions older than 3.4 , certain limitations and requirements should be kept in mind - the main ones being that capitalization of the function name is crucial, and that #include "vbs2\headers\function_library.hpp" has to be included in every script that utilizes it.
